## Core Competencies

### Engineering Support:

UDR offers a full array of engineering services ranging from initial design to operating systems engineering. We have extensive nuclear design, design authority, and field engineering support experience. Major roles supported include Project Engineer, Consulting Engineer, Construction Manager, and Subject Matter Expert.

### Administrative Support:

UDR currently provides over 50 administrative services personnel to DOE subcontractors across the nation. Supported positions include Consultant, Procedure Writer / Senior Technical Trainer, Program Specialist, Senior Project Analyst, Senior Training Coordinator, and Subject Matter Expert.

### Procedure Development and Implementation:

UDR has experience integrating training and procedures with client processes and objectives to achieve efficiency and maximize human performance. We have significant expertise in the application of DOE-STD-1029-92, Writer's Guide for Technical Procedures, and other industry standards for technical writing, and under the logistical and managerial requirements associated with supporting procedures organizations through an integrated approach with training and qualification programs. This integration produces user-friendly, well-written procedures and work instructions that become key components of human reliability required for complex, hazardous, or highly regulated environments.

### Quality Assurance / Contractor Assurance:

UDR currently is supporting QA needs across the complex. We are providing vendor quality visits and development of Qualified Suppliers List (QSL), project QA engineers, Quality Managers, field Quality Control inspectors. We support Savannah River and WIPP with Contractor Assurance by performing key assessments on contractor performance, managing contractor assurance programs and readiness reviews.

### Training:

UDR is particularly strong in the formal application of the Systematic Approach to Training (SAT), Learning Management Systems, and associated personnel qualification requirements mandated by DOE/NNSA and DOE Order 426.2, Personnel Selection, Training, Qualification, and Certification Requirements for DOE Nuclear Facilities. We have developed, managed, and implemented complete training and qualification programs for a wide variety of high-hazard projects, and employ qualified trainers for operations, maintenance, waste management and transportation. We possess extensive startup, commissioning, and facility readiness training for nuclear and non nuclear facilities. UDR has managed reviews and assessments of DOE facility site-wide training programs, to include development and implementation of corrective action and program improvement plans.

### Work Planning:

UDR provides work planning and scheduling expertise in the Integrated Work Planning process for Operations, Maintenance, and Construction activities. Our staff's expertise has been instrumental in the successful execution of thousands of tasks, including preventive maintenance, nuclear and non-nuclear facility modifications, construction, and D&D projects. Our planning experts have led senior work review groups, conducted critical interface with management and procurement, and performed complex scheduling, cost estimating, job hazard analyses, field walkdowns, and pre-job briefs.

### Past Performance:

- Waste Isolation Pilot Plant (WIPP)
- Savannah River Nuclear Solutions (SRNS)
- Savannah River Mission Completion (SRMC)
- Hanford Mission Integrated Solutions (HMIS)
